Marketing Page And Pricing

Use the public home page to explain Dispatcher365, show the 14-day card-required trial, and send customers to signup or shipment tracking.

1. Open the home page.

2. Review pricing and the fees menu.
3. Select Start 14-Day Trial when the customer is ready to set up billing.

Company Signup

A company signs up first. The workspace stays pending until super admin approval and billing are active.

1. Enter company name and fleet size.
2. Choose plan and active driver count.
3. Create the first admin user.
4. Use Stripe trial setup to add the card.

COMPANY SETUP

Create your Dispatcher365 workspace.

Start with the company account. A super admin reviews and approves the company first, then the first admin can log in and add dispatchers, drivers, equipment, locations, and assignments.

- 1 Company**
Create the fleet workspace.
- 2 Admin User**
Create the first company admin.
- 3 Approval**
Super admin enables the company workspace.

Public Shipment Tracking

Customers can track loads without logging into the dispatcher portal.

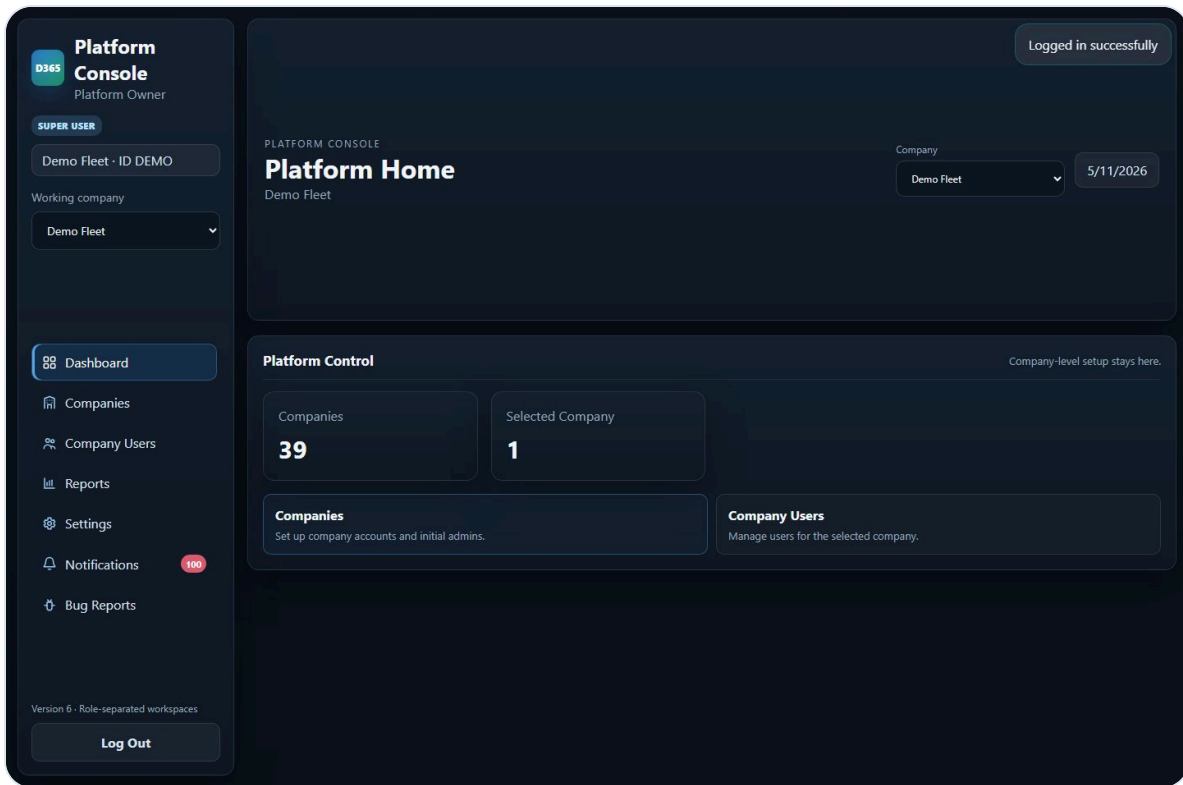

1. Open Shipment Tracking.
2. Enter the load or tracking ID.
3. Review status history, stops, and approved documents.

Admin Home

Admins manage company setup, users, drivers, equipment, assignments, billing status, and reports.

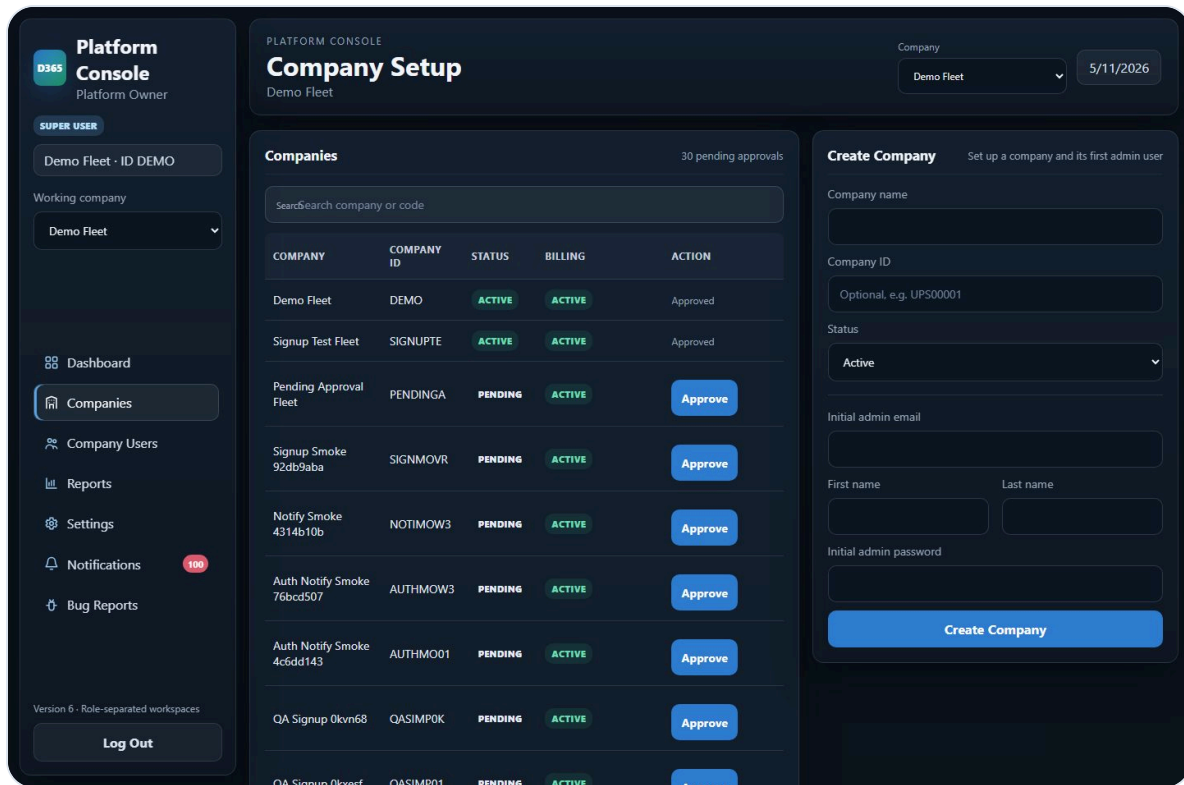

1. Log in as admin or super admin.
2. Use the dashboard cards to open setup areas.
3. Watch company approval and billing status before users log in.

Company Approval And Billing

Super admin approves companies and can see whether billing is active or blocking access.

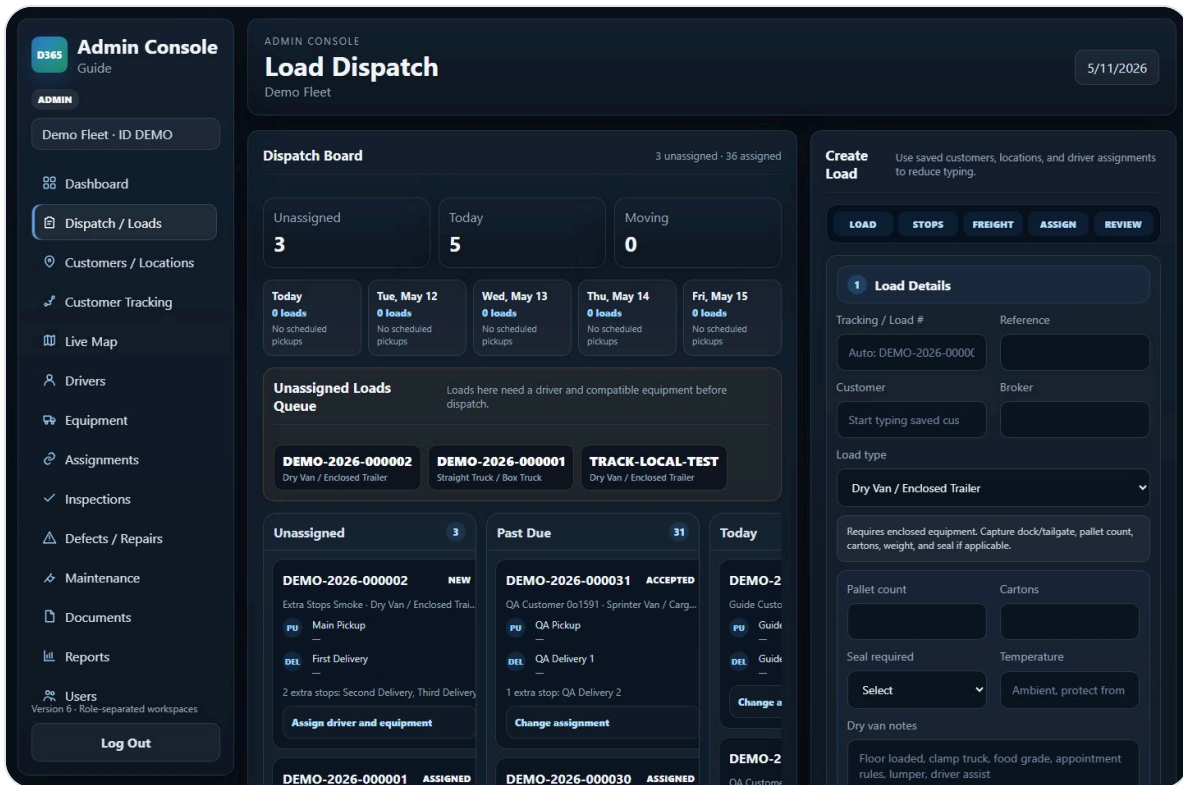

1. Open Company Setup.
2. Approve pending companies.
3. Use Mark Paid only when billing has been verified.

Dispatch Board And Create Load

Dispatchers create loads, add stops, assign drivers and compatible equipment, and monitor unassigned loads.

1. Open Dispatch / Loads.
2. Use saved customer/location fields to reduce typing.
3. Assign driver and vehicle.
4. Use the board to monitor today, upcoming, unassigned, and in-transit work.

Driver Check-In And Inspection

Drivers must complete a vehicle inspection before becoming ready for work or updating assigned loads.

1. Driver logs in on mobile.
2. Open Check-In.
3. Submit pre-trip inspection.
4. Start shift after the inspection unlocks readiness.

Inspection required

Submit a pre-trip inspection for GUIDE-VAN-18p2iv before starting your shift or updating assigned work.

Pre-trip Inspection

Required before this driver can be ready for work.

Driver Assigned Work

Drivers update pickup, transit, delivery, BOL/POD, exceptions, and signatures from the mobile assigned work page.

1. Open Assigned Work.
2. Use one-tap load status buttons.
3. Upload required proof documents.
4. Capture signature when needed.

The screenshot shows a mobile application interface with a dark theme. At the top, there is a 'CLOSE LOAD' button. Below it is a section titled 'Exception' with a 'Document type' dropdown menu set to 'POD'. Underneath is a 'Photo' section with a 'Choose Files' button and the text 'No file chosen'. Below that is a 'Note' section with a text input field containing 'Optional document note'. A large blue button labeled 'Upload BOL / POD' is positioned below the note field. Underneath the blue button is a button labeled '▶ Capture BOL Signature'. Below this entire section is a 'Recent Delivered' section with the text 'Latest completed loads' and a horizontal line, followed by the text 'No delivered loads yet.' At the bottom of the screen is a navigation bar with four icons: a person icon for 'Check-In', a calendar icon for 'Assigned Work' (which is highlighted with a blue border), a bell icon for 'Notifications' with a red badge showing the number '4', and a bug icon for 'Report Bug'.

Customer Tracking And Visibility

Dispatch can copy public tracking links and control which proof documents customers can see.

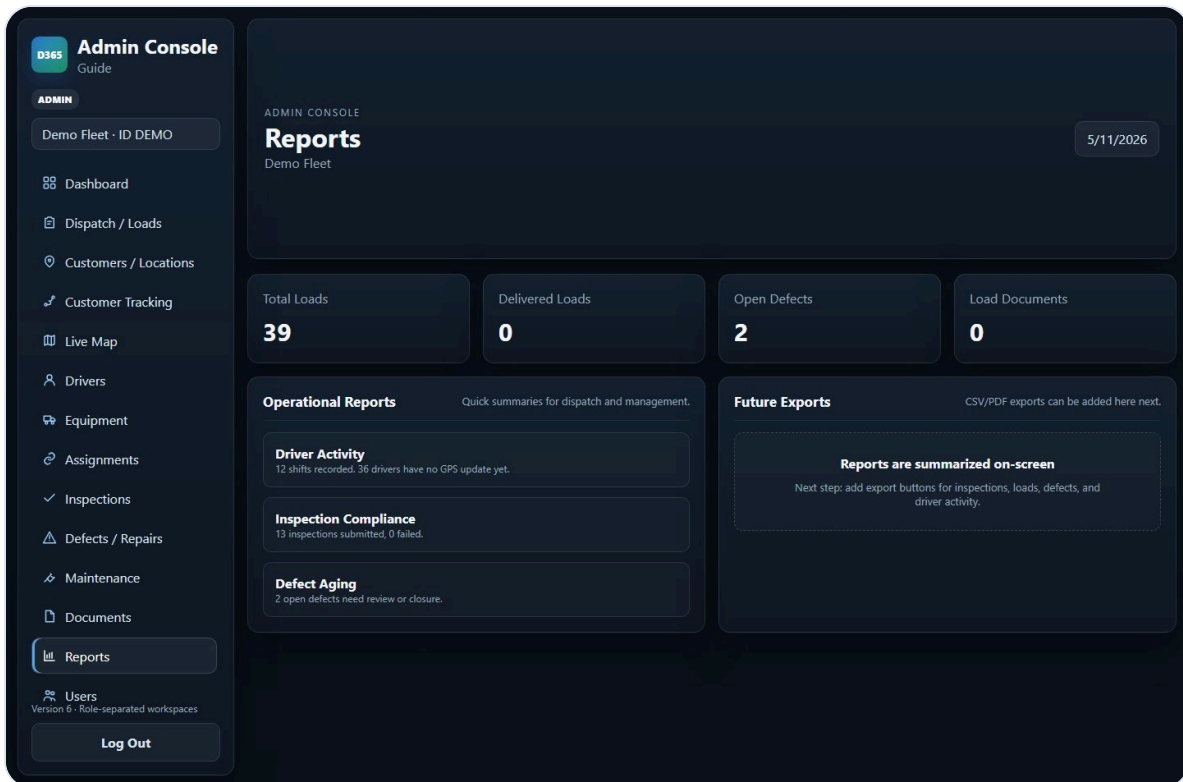

1. Open Customer Tracking.
2. Search customer or load.
3. Copy update text or tracking links.
4. Choose public BOL/POD visibility on the load card.

The screenshot displays the 'Admin Console' interface for 'Customer Tracking'. The left sidebar contains navigation links: Dashboard, Dispatch / Loads, Customers / Locations, Customer Tracking (selected), Live Map, Drivers, Equipment, Assignments, Inspections, Defects / Repairs, Maintenance, Documents, Reports, and Users. The main content area is titled 'Customer Tracking' and shows a 'Demo Fleet' overview with four metrics: Tracked Customers (39), Customers With Active Loads (38), Open Customer Loads (39), and BOL / POD Files (0). Below this is the 'CUSTOMER PORTAL' section, 'Shipment visibility by customer', which includes a search bar and three customer cards. Each card shows status (ASSIGNED or ACCEPTED), counts for active, delivered, and docs, latest activity, assigned drivers, and a list of actions (ASSIGNED, CONFIRM PICKUP, IN TRANSIT, CONFIRM DELIVERY, POD UPLOADED). The first card is for 'Guide Customer 18p2iv' (ASSIGNED), the second for 'QA Customer 18noq0' (ACCEPTED), and the third for 'QA Customer 179byj' (ACCEPTED). A 'Log Out' button is at the bottom left.

Reports, Settings, And Support

Reports summarize load activity, inspections, defects, documents, and driver activity. Settings show company configuration, notifications, and backup guidance.

1. Open Reports for operational summaries.
2. Open Settings to confirm setup status.
3. Use Bug Reports when staff or drivers need to report an app issue.

Important Notes

Each company keeps its own company-scoped data. If billing has a payment issue, portal access can be blocked. Super admin approval and active billing are both required.
